Commercial Quality  
Rekeyable Padlocks**

## 83/45 BRASS PADLOCK

*The locksmiths padlock of choice*

- Solid machined brass body
- Double ball shackle locking
- Removable core cylinder for quick rekeying
- Patented "quick change" shackle feature, allowing shackles to be changed in seconds
- Patented Z-bar cam system that allows convertibility from "push to lock" (non-key retaining) to "key to lock" (key retaining) within seconds
- Compatible with most restricted keying systems available, including Lockwood, Bilock, Kaba and Yale keying systems
- Shackles available in a choice of materials – special alloy, stainless steel and brass
- Shackles available in a range of sizes – 19mm, 25mm, 38mm, 50mm, 75mm and 100mm

## 83/50 BRASS PADLOCK

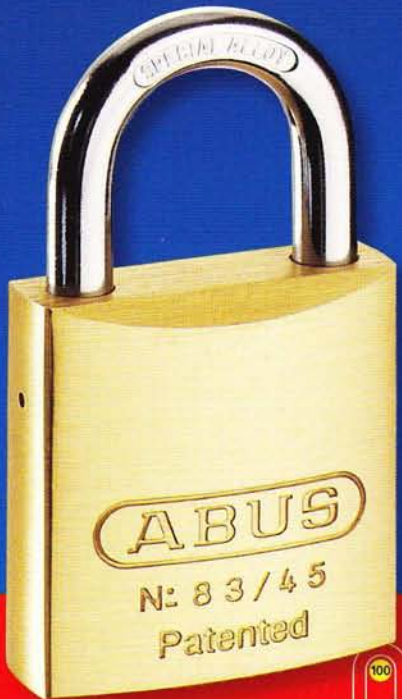

*All the great features of the 83/45, with additional security and that little bit of style*

- Heavy duty, satin chrome plated brass body
- Double ball shackle locking
- Removable core cylinder for quick rekeying
- Patented "quick change" shackle feature, allowing shackles to be changed in seconds
- Patented Z-bar cam system that allows convertibility from "push to lock" (non-key retaining) to "key to lock" (key retaining) within seconds
- Compatible with most restricted keying systems available, including Lockwood, Bilock, Kaba and Yale keying systems
- Shackles available in a choice of materials – special alloy, stainless steel and brass
- Shackles available in a range of sizes – 25mm, 38mm, 50mm and 75mm

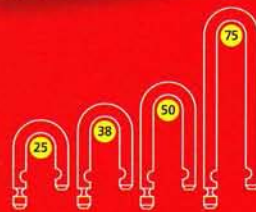

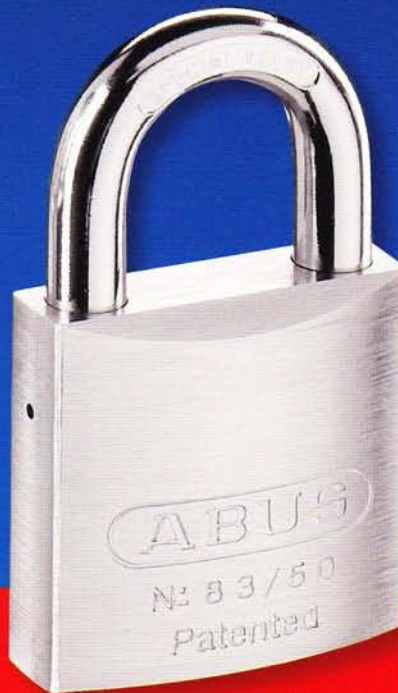

## 83/55 STEEL PADLOCK

*Super heavy duty, steel bodied padlock*

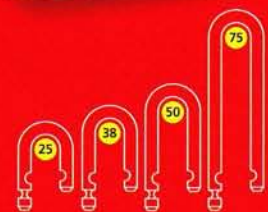

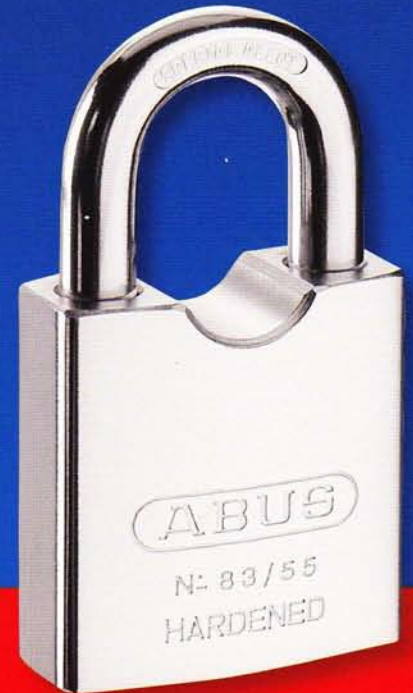

- Chrome plated, hardened steel lock body
- Double ball shackle locking
- Removable core cylinder for quick rekeying
- Shackles can be quickly changed for different applications
- Patented Z-bar cam system that allows convertibility from "push to lock" (non-key retaining) to "key to lock" (key retaining) within seconds
- Compatible with most restricted keying systems available, including Lockwood, Bilock, Kaba and Yale keying systems
- Special alloy shackle
- Shackles available in a range of sizes – 25mm, 38mm, 50mm and 75mm

Shackle diameter ..... 8mm  
Horizontal clearance ..... 23.5mm  
Vertical clearance ..... 19mm, 25mm, 38mm, 50mm, 75mm or 100mm

Shackle diameter ..... 9.5mm  
Horizontal clearance ..... 23.5mm  
Vertical clearance ..... 25mm, 38mm, 50mm or 75mm

Shackle diameter ..... 11.1mm  
Horizontal clearance ..... 25.5mm  
Vertical clearance ..... 25mm, 38mm, 50mm or 75mm

**83CS/45  
BRASS PADLOCK**

*Close shackle version  
of the 83/45*

- Solid machined brass body
- Double ball shackle locking
- Removable core cylinder for quick rekeying
- Patented "quick change" shackle feature, allowing shackles to be changed in seconds
- Patented Z-bar cam system that allows convertibility from "push to lock" (non-key retaining) to "key to lock" (key retaining) within seconds
- Extra shackle protection for additional security
- Compatible with most restricted keying systems available, including Lockwood, Bilock, Kaba and Yale keying systems
- Shackles available in a choice of materials – special alloy, stainless steel and brass

 Rekeyable Padlocks**

Security Tech Germany

## 83 Series Special Application Padlocks

### 83MAR/45 BRASS PADLOCK

*The Mariner Padlock, designed for marine conditions*

- Stainless steel shackle
- Satin pearl chrome plated machined brass body
- Weather cover
- Double ball shackle locking
- Precision pin tumbler mechanism, incorporating 570 style barrel
- Patented Z-bar for key retention. Can be converted to non-key retaining within seconds
- Compatible with most restricted keying systems available, including Lockwood, Bilock, Kaba and Yale keying systems
- Excellent corrosion protection, suitable for use in aggressive sea water environment

### 83WP/53 & 83WP/63 STEEL PADLOCK

*The Z - Extreme for the harshest of conditions*

- Alloy steel shackle
- Solid steel lock body
- Double ball shackle locking
- Full plastic jacket with sophisticated drainage system
- Precision pin tumbler mechanism, incorporating 570 style barrel
- Patented Z-bar for key retention. Can be converted to non-key retaining within seconds
- Compatible with most restricted keying systems available, including Lockwood, Bilock, Kaba and Yale keying systems
- Corrosion protected through special galvanisation of lock body and additional durable plastic housing

### 83AL/45 ALUMINIUM PADLOCK

*Colour, style & functionality in a commercial grade padlock*

- Solid machined aluminium body
- Double ball shackle locking
- Removable core cylinder for quick rekeying incorporating 570 style barrel
- Patented Z-bar for key retention. Can be converted to non-key retaining within seconds
- Compatible with most restricted keying systems available, including Lockwood, Bilock, Kaba and Yale keying systems
- Shackles available in special alloy and stainless steel
- Shackles available in a range of sizes – 19mm, 25mm, 38mm, 50mm, 75mm and 100mm
- Available in black, blue, green, orange, purple and red
